july 26 - august 22

13 Months of 28 Days

| Day Out-Of-Time | Peace Through Culture Festival

13 Months of 28 Days + 1 = 365

The 13 Month 28 Day Count is a solar/lunar/galactic perpetual synchronizing tool.
 It is Solar, because of its integration to the 365 total days the Earth spins around the Sun.
 Lunar, because it flows through the 13 Moon(Month) Cycles of 28 days each.
 Galactic, because the start of the new year is based on a galactic reference point,
 the star Sirius-B, and not a lunar or solar one (such as the summer solstice, new moon, etc.)
 Gregorian July 26 is the day that the star Sirius-B rises in conjunction with the Sun.

Every year since 1992, Day Out of Time has been celebrated worldwide.
 Everybody is invited to organize a Festival in their local community.
 The Day Out of Time is the perfect moment for universal peace and pardon,
 as well as experiencing the harmony of the New Time - the time of nature and interconnectivity.
